# Download instructions for V1 and V2

GalaxyView is a software application developed for debugging industrial cameras. It is applicable to GigE, USB3.0, USB2.0 interface area cameras, and supports real-time preview, parameter configuration, image acquisition and other functions. DAHENG IMAGING has officially released Version2(V2) of GalaxyView now, which optimaizes the UI and improves usability.

V1   V2

There are Version1(V1) and Version2(V2) of GalaxyView on the DAHENG IMAGING website: [Downloads]-[Software]. The names and versions of the V1 and V2 GalaxyView as follows:

Name of Software	Version	SDK
